Díly ohnuté popř. pokroutené vlivem teplotních změn a stárnutí materiálu, mohou být narovnané do požadovaného tvaru pomocí proudu teple vody nebo vzduchu (fén na vlasy). Různé drátky a tyčky nejsou přiloženy. Kontaktní plochy doporučujeme před lepením odmastit.

Parts slightly distorted and bent owing to temperature changes or due to material ageing can be straightened to requested shape by hot water or hot air jet (hair dryer). This process can be repeated till result is entirely satisfactory. Wires and rods not included. It is recommended to remove grease from contact areas

K lepení použít kyanoakrylátové lepidlo / For best gluing results use cyanoacrylate glue
